JOB APPLIED FOR Senior Java developer | Tech Lead | Java Architect | Software Architect

Creative and innovative Software Engineer with 25+ years of experience creating different applications. Well-versed in all phases of project management. Thought, designed, and deployed innovative back-end solutions in many projects. Seeks to leverage a high-level understanding of client needs for optimizing applications. Resourceful Solution Architect with 7 years of customer relationship management and implementation support. Highly skilled in managing database performance and upgrades for ongoing efficiency and achievement of corporate objectives.

SKILLS

- Core skills**
- Requirement analysis, specification, design and development of software using SDLC and Agile (Scrum) methodologies
 - Design and implementation of enterprise systems
 - Domain and business process analysis and modelling
 - Development, delivery and maintenance of distributed enterprise applications
 - Database structure design and development
 - Integration of external applications
 - Software design and architecture
 - Systems Engineering
 - Hardware and Software Optimization
 - Development, delivery and maintenance of distributed enterprise applications

- Programming Languages**
- Programming - primary
 - Java (1.5 - 21)
 - Perl
 - SQL (for various databases)
 - unix shell (sh, bash)
 - Programming - secondary: C, JavaScript, Rust, Pascal (Borland pascal, Object pascal (Borland Delphi 1-7), Free pascal), Scala, Groovy, Ruby, Racket, Standard ML, JavaScript, PHP, Macro Assembler
 - Markup: HTML, XML, XSD, XSLT, MD
 - Other: LaTeX

- Technologies**
- Object Oriented Design and UML diagrams
 - AWS, RabbitMQ, Apache Kafka, Redis
 - JUnit, TestNG, JMeter, Gatling
 - REST, JSON, SOAP
 - J2EE, Spring, SpringBoot, Quarkus, JSP, JSF, XUL
 - Containerization: Docker, Podman, LXC
 - JDBC, JDO, JPA, QueryDSL, JOOQ
 - JavaPOS, NDC (NCR Direct Connect Protocol), JNDI, JNI
 - Gradle, Maven, Ant, make

- Databases** Oracle, PostgreSQL / TimeScaleDB, Interbase / Firebird, MySQL, MSSQL

VCS GIT, Subversion, Mercurial

Operating systems / Virtualization – Linux (Debian, OpenSuse/SLES, RHEL/Centos)
– XenServer
– VirtualBox
– VMWare
– Windows(desktop and server)

Business areas – fintech banking and financial
– automotive
– supply chain
– electricity supply
– AUDS (Anti-UAV defense system)

EXPERIENCE

Feb 2017 – Present **Solution Architect**

Finik.PRO' Ltd, Kyiv (Ukraine)

- Collaborated with customers to develop integrated solutions and provide technical guidance.
- Defined technical roadmaps, coding standards, and led development efforts.
- Conducted software analysis, programming, testing, and debugging.
- Implemented CI/CD processes and industry best practices.
- Designed scalable solutions and participated in design meetings.
- Reviewed code, investigated issues, and provided solutions.
- Maintained software documentation and explored new technologies.
- Managed deployments, authored code fixes, and optimized systems.
- Developed software allowed to reduce customers' costs by 20%

Business or sector Fintech, Internet banking and other financial systems

Feb 2023 – Jun 2025 **Solution Architect**

USAID SOERA

- participated in the analysis and diagnosis of the current state of IT landscapes and business processes in order to identify problem areas, possible improvements and determine software requirements
- prepared of recommendations for the implementation of software that will contribute to the optimization of business processes and the achievement of better results.
