JOB APPLIED FOR Senior Java developer | Tech Lead | Java Architect | Software Architect

Creative and innovative Software Engineer with 25+ years of experience creating different applications. Well-versed in all phases of project management. Thought, designed, and deployed innovative back-end solutions in many projects. Seeks to leverage a high-level understanding of client needs for optimizing applications. Resourceful Solution Architect with 7 years of customer relationship management and implementation support. Highly skilled in managing database performance and upgrades for ongoing efficiency and achievement of corporate objectives. Available for remote collaboration with distributed teams.

SKILLS

- Core skills**
- Requirement analysis, specification, design and development of software using SDLC and Agile (Scrum) methodologies
 - Design and implementation of enterprise systems
 - Domain and business process analysis and modelling
 - Development, delivery and maintenance of distributed enterprise applications
 - Database structure design and development
 - Integration of external applications
 - Software design and architecture
 - Systems Engineering
 - Hardware and Software Optimization
 - Development, delivery and maintenance of distributed enterprise applications

- Programming Languages**
- Programming - primary
 - Java (1.5 - 21)
 - SQL (for various databases)
 - unix shell (sh, bash)
 - Programming - secondary: C, Perl, JavaScript, Rust, Scala, Groovy, Ruby, Python, Assembler etc
 - Markup: HTML, XML, XSD, XSLT, MD
 - Other: LaTeX

- Technologies**
- Object Oriented Design and UML diagrams
 - RabbitMQ, Apache Kafka, Redis
 - JUnit, TestNG, JMeter, Gatling
 - REST, JSON, SOAP
 - J2EE, Spring, SpringBoot, Quarkus, JSP, JSF, XUL
 - Containerization: Docker, Podman, LXC
 - JDBC, JDO, JPA, QueryDSL, JOOQ
 - JavaPOS, NDC (NCR Direct Connect Protocol), JNDI, JNI
 - Gradle, Maven, Ant, make

- Cloud Platforms**
- AWS (EC2, SNS, SQS, S3, ELB, IAM, API Gateway, RDS, DynamoDB, CloudWatch)
 - GCP
 - Azure

Databases Oracle, PostgreSQL / TimeScaleDB, Interbase / Firebird, MySQL, MSSQL

VCS GIT, Subversion, Mercurial

Operating systems / Virtualization

- Linux (Debian, OpenSuse/SLES, RHEL/Centos)
- XenServer
- VirtualBox
- VMWare
- Windows(desktop and server)

Business areas

- fintech banking and financial
- automotive
- supply chain
- electricity supply
- AUDS (Anti-UAV defense system)

EXPERIENCE

Nov 2024 – Present **Solution Architect**

Confidential — Anti-UAV Defense System (AUDS)

- **Architected a high-availability UAV threat intelligence platform**, ensuring sub-second latency for real-time signal detection and RF fingerprinting.
- **Spearheaded the technical roadmap and coding standards**, aligning development across cross-functional teams to meet rigorous defense-industry compliance.
- **Designed and implemented a scalable architecture** capable of handling high-throughput sensor data from diverse hardware integrations.
- **Established automated CI/CD pipelines** that reduced deployment cycles by 40% while maintaining strict security and stability protocols.
- **Optimized system performance** through targeted software analysis and debugging, resolving critical bottlenecks in data processing layers.
- **Advised stakeholders on emerging electronic warfare technologies**, integrating cutting-edge industry trends (like BSI Flex 335) into the core product strategy.

Core Tech: Java, JavaScript, PostgreSQL, CI/CD, RF Data Processing

Business or sector AUDS (Anti-UAV defense system)

Feb 2017 – Present **Solution Architect**

Finik.PRO' Ltd, Kyiv (Ukraine)

- **Architected and delivered** high-availability cloud solutions on AWS, leveraging API Gateway, RDS, and DynamoDB to ensure seamless scalability for enterprise clients.
- **Reduced operational costs by 20%** for customers through strategic software optimization and cloud resource management.
- **Spearheaded the technical roadmap** and established organization-wide coding standards, ensuring high-quality delivery across multiple development teams.
- **Designed and implemented robust CI/CD pipelines**, significantly reducing deployment lead times and improving release stability via industry best practices.
- **Served as a Technical Liaison**, bridging the gap between business stakeholders and engineering teams to translate complex requirements into actionable architectural designs.
- **Engineered comprehensive monitoring and alerting strategies** that improved system uptime and reduced Incident Response Time (MTTR).
- **Led rigorous code reviews and root-cause analyses**, mentoring junior engineers and fostering a culture of technical excellence and continuous improvement.
- **Directed full-lifecycle development**, from initial data modeling and performance tuning to final deployment and documentation for large-scale integrated systems.

Business or sector Fintech, Internet banking and other financial systems

Feb 2023 – Jun 2025 **Solution Architect**

USAID SOERA

- **Led comprehensive IT audit and diagnostic assessments** of complex government IT landscapes, identifying critical bottlenecks and areas for modernization.
- **Defined the Target IT Architecture** and strategic roadmaps for government entities, aligning technological infrastructure with USAID-backed business optimization goals.
- **Engineered strategic software implementation plans** that streamlined cross-departmental business processes and enhanced organizational transparency.
- **Acted as Primary Technical Advisor** to USAID and government stakeholders, providing high-level technical governance and feasibility analysis for nationwide digital initiatives.
- **Developed actionable transformation recommendations**, facilitating the transition from legacy systems to modern, scalable software solutions.

Business or sector Government / International DevelopmentSep 2016 – Jul 2021 **Software Architect/Senior Software Developer**

National Commission for the State Regulation of Communications and Informatisation, Kyiv (Ukraine)

- Led the design of a cutting-edge report system for telecom/internet providers, transforming data analytics for strategic decision-making.
- Developed architecture strategies for large-scale deployments.
- Prioritized architectural updates based on business success drivers.
- Aligned application architecture with business goals.
- Implemented in Perl (MVP), Java, and Vue.js.
- Designed technology solutions meeting or exceeding performance expectations.
- Delivered unit-tested systems within customer-defined timelines.
- Implemented a robust report system, reducing manual data entry by 80% and improving accuracy by 70%

Business or sector GovernmentJan 2014 – Dec 2019 **Software Architect/Senior Software Engineer**

Contracts With Various Ukrainian Banks (NDA) – Kyiv (Ukraine)

- Customized software for diverse hardware environments, promoting cross-system compatibility.
- Authored development guidelines for accelerated application design.
- Communicated software architecture strategies to senior leadership and third-party partners.
- Established integrations between banks and payment systems/providers.
- Developed full-stack POS terminal applications, from device drivers to REST API.

Business or sector FintechJan 2006 – Dec 2022 **Software Architect/Senior Software Engineer**

IterCom Ltd

- Authored development guidelines to expedite application design efforts through ready-made frameworks.
- Customized in-development software to clients' current hardware environments, designing applications to span multiple systems.
- Communicated software architecture strategies to senior leadership and third-party business leaders.
- Developed application architecture strategy to specifically align with employer business goals.
- Developed financial and accounting system for some corporation branches.

Business or sector AutomotiveJul 1993 – Jan 2006 **Software Developer**

Bank Mriya

- Collaborated on stages of systems development lifecycle from requirement gathering to production releases.
- Revised, modularized and updated old code bases to modern development standards, reducing operating costs, and improving functionality.
- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development.
- Led version control efforts for organization, employing public and open source repositories.
- Coordinated with project management on database development timelines.
- Participated in software field testing to verify performance of developed projects.

Business or sector Banking

EDUCATION AND TRAINING

PhD Management Information Systems, Thesis title: 'Risk management in IT outsourcing'

International Open University, Interregional Academy of Personnel Management, Kyiv (Ukraine)

Magister Microelectronics and semiconductor devices

Kiev Polytechnic Institute, Kyiv (Ukraine)

TRAINING AND CERTIFICATION

Aug 2024 IBM AI Engineering Professional Certificate (V2), Coursera, IBM
 Feb 2023 AWS Cloud Solutions Architect, Coursera, Amazon
 Dec 2021 Foundation Enterprise Architect Certification Trng, TOGAF, Udemy
 Aug 2020 Investment Management, Coursera, Amazon
 Machine Learning, Coursera, Stanford University
 Web Application Architectures, Coursera, University of New Mexico
 Social Psychology, Coursera, Wesleyan University
 Functional Programming Principles in Scala, Coursera, École Polytechnique Fédérale de Lausanne
 Algorithms: Design and Analysis, Coursera, Stanford University
 Model Thinking, Coursera, University of Michigan
