Summary

Software Architect with 20+ years of experience in backend and distributed systems. Specializing in scalable backend platforms, real-time processing, and high-load architectures. Experienced in designing production systems from concept to deployment, balancing scalability, performance, and complexity. PhD in Management Information Systems (EQF Level 8, recognized in Romania).

Core Expertise

- Distributed systems & system design
- Backend architecture (Java)
- High-load & real-time systems
- Messaging & event-driven systems (MQTT, Kafka)
- Database performance & data-intensive systems
- Cloud architectures (AWS)

Technologies

Java · PostgreSQL · Kafka · MQTT · AWS · Docker · REST · JPA · QueryDSL · CI/CD

Experience

Solution Architect Nov 2024 – Present

Anti-UAV Defense System (Confidential)

- Architected real-time UAV threat detection platform (sub-second latency)
- Designed distributed system for high-throughput sensor data processing
- Built scalable pipelines integrating heterogeneous hardware sources
- Introduced CI/CD pipelines (↓ deployment time 40%)
- Resolved performance bottlenecks in data processing layers

Solution Architect Feb 2017 – Present

Finik.PRO Ltd (Fintech / Banking)

- Designed distributed backend systems on AWS (API Gateway, RDS, DynamoDB)
- Built scalable financial systems with real-time processing capabilities
- Reduced infrastructure costs by 20% through optimization strategies
- Implemented CI/CD and monitoring systems improving system reliability
- Led architectural decisions across multiple teams

Solution Architect Feb 2023 – Jun 2025

USAID SOERA

- Conducted IT audits and identified architectural bottlenecks

- Defined target architecture and modernization roadmap
- Designed integration and data flows across systems
- Advised on large-scale digital transformation initiatives

Software Architect / Senior Engineer
National Commission for Communications

Sep 2016 – Jul 2021

- Designed large-scale reporting platform for telecom providers
- Reduced manual data entry by 80% and improved accuracy by 70%
- Built backend systems (Java) and analytics workflows
- Introduced scalable architecture for growing datasets

Software Architect / Senior Engineer
Banking Projects (NDA)

Jan 2014 – Dec 2019

- Designed integrations between banking systems and payment providers
- Built POS terminal software (device layer to backend APIs)
- Developed cross-system communication architectures

Software Architect / Senior Engineer
IterCom Ltd

Jan 2006 – Dec 2022

- Designed enterprise systems for automotive and financial domains
- Built distributed applications for multi-branch organizations
- Developed reusable frameworks and architecture standards

Software Developer
Bank Mriya

Jul 1993 – Jan 2006

- Developed banking systems across full SDLC
- Modernized legacy systems improving performance and maintainability
- Participated in database design and optimization

Education

PhD in Management Information Systems
EQF Level 8 (recognized in Romania as Economic Informatics)
MSc in Microelectronics
Kyiv Polytechnic Institute

Certifications

AWS Cloud Solutions Architect
IBM AI Engineering Professional Certificate
TOGAF Foundation

Languages

Russian (Native), Ukrainian (C2), English (B2/C1), Romanian (A2)
